Selective Pallet Racking System

Selective pallet racking is the most common pallet racking system in use today. It is safe in use and cost is low. Pallet racks create order and maximize storage density in a warehouse, making good use of floor space and ceiling height.

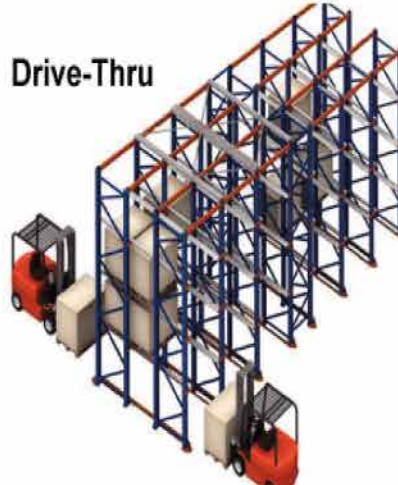

Drive In Pallet Racking

Drive-in pallet racking provides an ideal storage system for crushable goods that cannot be block stacked or for pallets with predictable, 'first in – last out' stock rotation.

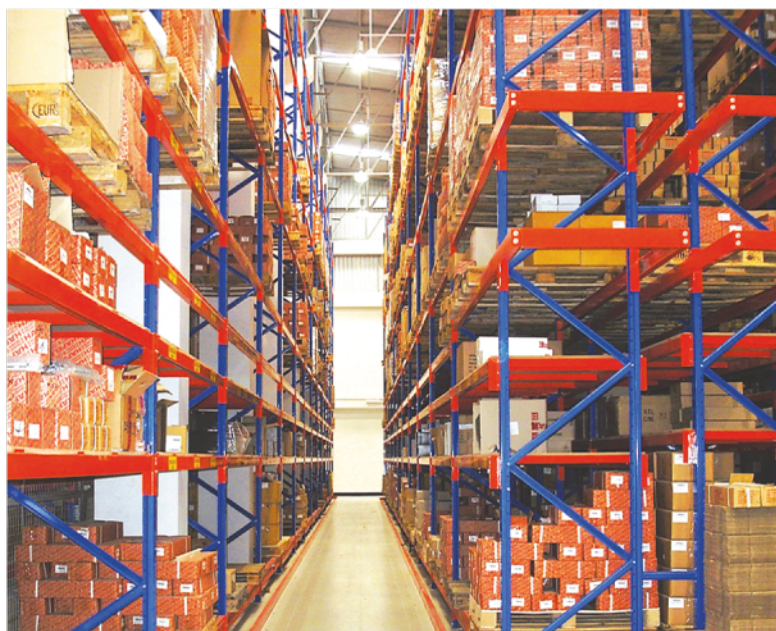

Drive-Thru

VNA Racking System

Very Narrow Aisle (VNA) racking is similar to Selective racking but decreases the aisle widths by %50 for greater storage capacity.

Double Deep Racking System

Double Deep Racking offers a cost effective method of bulk storage to save floor space.

Cantilever Racking

Cantilever systems especially it is custom made racking for the storage of long goods such as pipes timber etc. It is mainly available light, medium & heavy duty

Carpet Racking Systems

Carpet Storage Rack can be used to create storage sections suitable for carpet rolls of 3 ,2 and 4 meters in length and to allow the carpets to be stored using a forklift truck. Based on your dimensions and needs, carpet storage rack can built to accommodate your product.

Special Racking System

Tire Racking Systems

Tire Racking Systems are unique. Warehouse shelving systems Specially Designed for the Storage of these tires and wheels.

Cable Racking Systems

In the electrical wires of building a cable tray systems is used to support installed electric cables used for the power distribution and communication

Rack Supported Mezzanine

The mezzanine floor is an all steel construction and being a bolted assembly, can be dismantled and relocated if your needs change in the future.

Medium Duty Racking System (Long Span Shelving)

Long Span Shelving Rack has a wonderful look and scientific structures. The upright is made of the cold rolled steel sheet which is bent and rolled and it has the double line of holes and there is a gap of 50mm distance between two holes. The shelf panels are made according to the request it is convenient to disassemble and assemble and it is widely used in the warehouse and super market.

Boltless Shelving System

The ANP boltless shelving system is a flexible modular system with shelves adjustable to 50mm increment. It is easily assembled and with the design potential to accommodate single level and high-rise storage system. We can make upto any size as per customer requirements.

Slotted Angle Shelving System

Slotted Angle provides simple, cost-efficient solutions for virtually any storage requirement. The unique pre-punched hole pattern allows multiple steel sections to be bolted together to form sturdy shelving and storage systems.

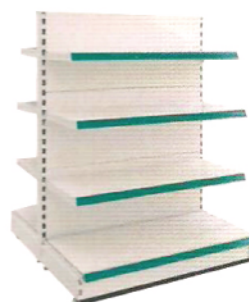

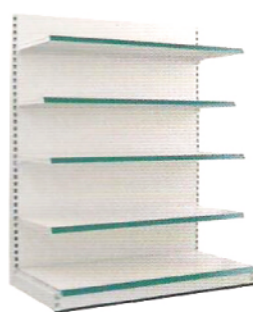

Mobile Shelving System.

The mobile shelving unit is excellent for any office environment as it has safety anti-tip devices. It is light weight and is mechanically operated for practicality and storage requirements.

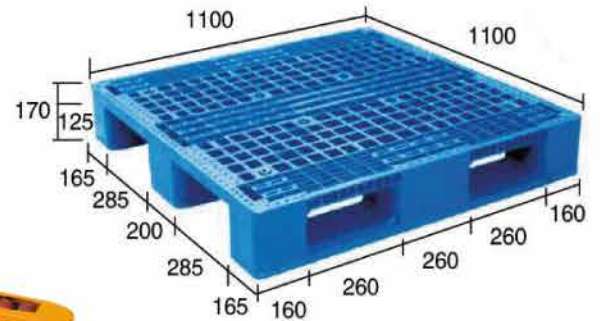

Supermarket Shelving

Al Reesi have the capacity to provide all kind of supermarket shelving to equipments display shelving shop fitting etc...
