**THE BEST  
STORAGE  
SOLUTION**

## ABOUT US

“ Al-Reesi Group Storage Solutions were first established in U.A.E. Abu Dhabi as storage and logistics solution provider by a team of young national engineering graduates. During the past years it has grown rapidly and it has diversified its activities in different fields by hard work and by the support of valuable clients from various public and private sectors of U.A.E & OMAN. Now a family owned company, it has grown steadily become one of the prominent storage manufactures in the Gulf region, with branches has unit of production in Oman which caters all over Gulf and African markets. ”

## Heavy Duty Racking System

- Selective Pallet Racking
- Drive in Pallet Racking
- Very Narrow Aisle Racking
- Double Deep Pallet Racking

## Medium Duty Racking System

- Boltless Shelving System
- Long Span Shelving Racking
- Multi Tier Racking

## Light Duty Racking System

- Slotted Angle Shelving System

## Special Racking System

- Mobile Shelving Racking
- Supermarket Shelving Racking
- Tire Racking
- Cable Racking
- Carpet Racking
- Rack Supported Mezzanine
- Cantilever Racking

## Heavy Duty Racking System

We are the manufacturer of different type of Heavy Duty Racking System and we can make up to any size .

## Selective Pallet Racking System

Selective pallet racking is the most common pallet racking system in use today. It is safe in use and cost is low. Pallet racks create order and maximize storage density in a warehouse, making good use of floor space and ceiling height.

## Drive in Pallet Racking System

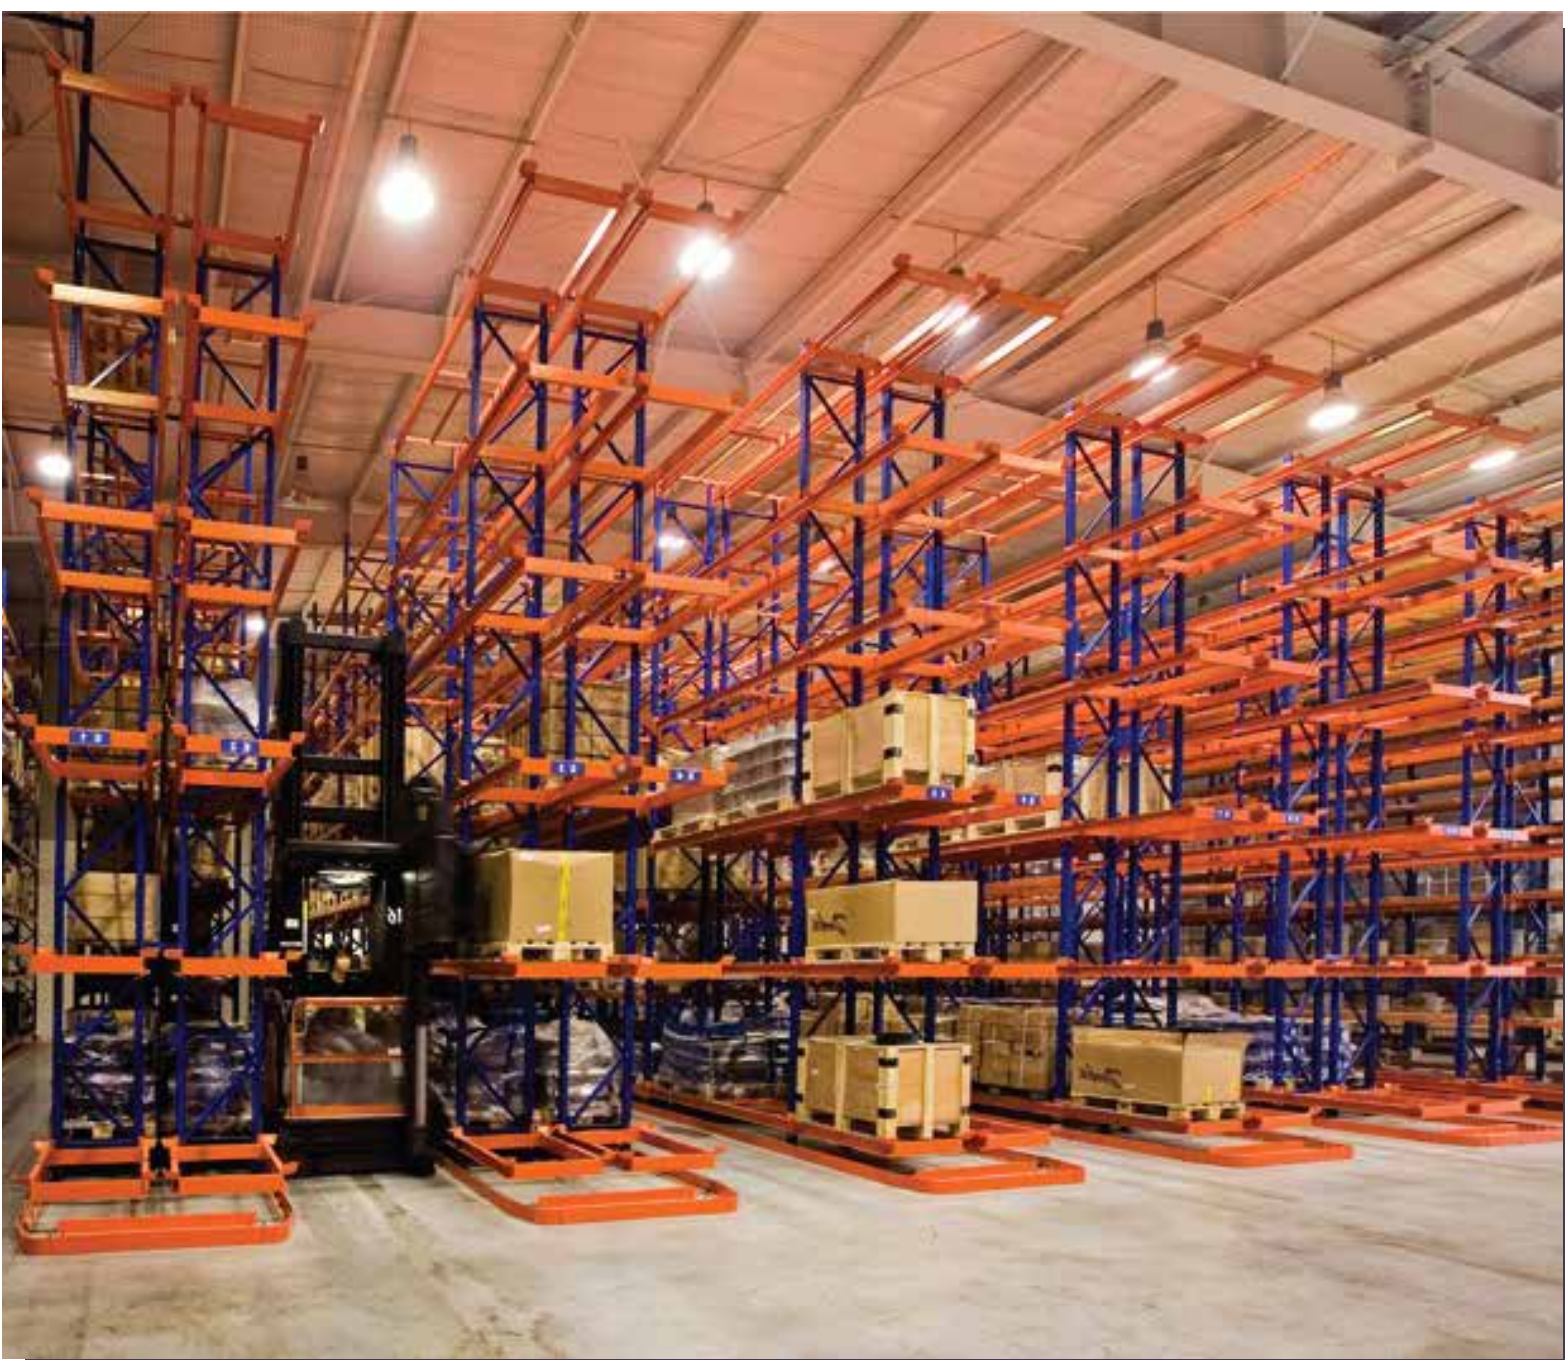

Drive-in pallet racking provides an ideal storage system for crushable goods that cannot be block stacked or for pallets with predictable, 'first in – last out' stock rotation.

## Very Narrow Aisel Racking

Very Narrow Aisle (VNA) racking is similar to Selective racking but decreases the aisle widths by 50% for greater storage capacity.

## Double Deep Pallet Racking

Double Deep Racking offers a cost effective method of bulk storage to save floor space.

## Medium Duty Racking System (Boltless Shelving System)

The boltless shelving system is a flexible modular system with shelves adjustable to 50mm increment. It is easily assembled and with the design potential to accommodate single level and high-rise storage system. We can make upto any size as per customer requirements.

## Long Span Shelving System

Long Span Shelving Rack has a wonderful look and scientific structures. The upright is made of the cold rolled steel sheet which is bent and rolled and it has the double line of holes and there is a gap of 50mm distance between two holes. The shelf panels are made according to the request it is convenient to disassemble and assemble and it is widely used in the warehouse and super market.

## Multi-tier Racking

Multi-tier Racking system is the fastest way to add extra floor space within the shade of an existing building. It allows businesses to double their floor space without changing premises. It also allows to create separate zones within one centralized facility so that separate areas can be created depending on requirement.

## Light Duty Racking System (Slotted Angle Shelving System)

Slotted Angle provides simple, cost-efficient solutions for virtually any storage requirement. The unique pre-punched hole pattern allows multiple steel sections to be bolted together to form sturdy shelving and storage systems.

## Special Racking System (Mobile Shelving Racking)

The mobile shelving unit is excellent for any office environment as it has safety anti-tip devices. It is light weight and is mechanically operated for practicality and storage requirements.

## (Supermarket Shelving Racking)

The Supermarket shelving unit is excellent for any supermarket environment as it has safety anti-tip devices. It is light weight and is mechanically operated for practicality and storage requirements.

## Tire Racking

Tire Racking Systems are unique. Warehouse shelving systems Specially Designed for the Storage of these tires and wheels.

## Cable Racking

In the electrical wires of building a cable tray systems is used to support installed electric cables used for the power distribution and communication.

## Carpet Racking

Tire Racking Systems are unique. Warehouse shelving systems Specially Designed for the Storage of these tires and wheels.

## Rack Supported Mezzanine

The mezzanine floor is an all steel construction and being a bolted assembly, can be dismantled and relocated if your needs change in the future.

## Cantilever Racking

Cantilever systems especially it is custom made racking for the storage of long goods such as pipes timber etc. It is mainly available light, medium & heavy duty

# Galvanized Grating

## Power Coating

Power Coating stands out in the market for its highest standards of powder coating finish. This is achieved through an elaborate eco-friendly pre-treatment process followed by powder coating using our fully automated coating facility.

# Why Al Reesi Group ?

- The First and only Omani Company having the Racking Factory in Sultanate of Oman – Made in Oman
- Less delivery time
- Better Price and excellent Quality
- ISO Certified
- Warrantee
- Free consultancy and auto cade computerized customized designing
- Local Branded Product with more 10 years of trust in the gulf
- Economically better for Sultanate of Oman & people of Oman
- Less Supply risk – Made in Oman (Omani Brand by Omani Owner of the Company)
- Focused on TQM (Total Quality Management)
- Any change required in the middle of the Project, Al Reesi can do it immediately as it has it's qualified designing & Sales team, manufacturing & installation team in Sultanate of Oman, always available.
- Well experienced for past 10 years in GCC countries, with multiple Projects in UAE, Oman and Qatar
